
Getting Started with Your Start Page

Posted by ESLPAL - 2007/12/05 20:51

Well first, please be aware that you can change almost everything that is on your default start page. You can include more: email services, Chat services, Games, Gadgets, Gizmos, and even stuff from your blogs or personal sites. You are only limited by your imagination.

So first, you must go and activate your email account, need help go here [getting started with gmail](#)

After you've done that you can go to your www.start.eslpal.com Start Page.

Next, look in the top right hand corner and sign in using the username and password you used for your email account. (If you haven't signed out after being in your email, you won't need to sign in again:)

Finally, you'll also see a link which says "Add Stuff", click on this and now you can see all the choice you have. Relax play around and enjoy yourself getting organized.
